- F. Adequacy of ingress and egress to the subject property and to all proposed buildings, structures, and uses thereon, with particular reference to pedestrian and automotive safety and convenience, traffic flow and control, and access in the event of a fire or another emergency.**

The subject property is located within an existing subdivision, which has adequate ingress and egress.

The proposed use does not require buffer or transitional buffers by the zoning district.

M. Whether there is adequate provision of refuse and service areas.

An adequate refuse and service area will be provided by the applicant.

N. Whether the length of time for which the special land use permit is granted should be limited in duration.

If granted approval, the special land use permit should not be transferable and only applicable to the current applicant, operator(s), and homeowner(s).

O. Whether the size, scale, and massing of proposed buildings are appropriate in relation to the size of the subject property and in relation to the size, scale, and massing of adjacent and nearby lots and buildings.
