

# Stonecrest Bicycle, Pedestrian & Trail Plan

*Community Open House – October 11, 2023*

The City of Stonecrest is in the process of developing a comprehensive Bicycle, Pedestrian and Trail Plan that will deliver a safe, connected, and integrated multimodal network blueprint. The planning process will result in a Recommendations and Implementation Plan that will identify a long-range vision, projects, and strategies crucial to achieving the integrated multimodal network developed through this plan.

## Why are we here?

The project team has identified draft recommendations that will help the City of Stonecrest achieve a safe, equitable and integrated multimodal network that is accessible for all members of the traveling public. Today we are asking for your feedback on which projects and policies should continue to move forward in the planning process.

Around the room you will see display boards that depict the project recommendations that the team has developed in response to feedback and results from prior engagement activities and events. The project team also performed a propensity analysis, assessed existing conditions, and reviewed prior plans to compile the draft recommendations. The project team would like to hear from you today on which projects you support and would like to see move forward. This feedback will be utilized to continue to refine the proposed project list. Feedback can be provided via comment form today, or via the project's online engagement website, which can be accessed via the QR code below.
